## STATUTORY SUMMARY

---

620.495, RSMo, as amended

*PURPOSE: The purpose of this program is to generate private funds to be used to establish a “protective business environment” (incubator) in which a number of small businesses can collectively operate, fostering growth and development during a business start-up period.*

# Program Description

***“An incubator is a building, which can be divided into smaller units of space to be leased by small businesses.”***

An incubator is also a program without infrastructure in which participants avail themselves of business development services to assist in the growth of their start-up businesses.

In addition to the space, incubators provide business development services for use by the tenants and participants. These services shall include, but are not limited to, financial consulting assistance, management and marketing assistance, business education, and physical services such as personal computers, copier, facsimile, conference rooms, labs, etc. Because of the shared services and efficient use of the available space, costs are usually much less than for a small business operating independently.

The incubator is not intended to be a permanent home for the new firm. After a period determined by the incubator's policy, a tenant will move from the incubator, thereby making room available in the incubator for a new start-up firm.

The Missouri Department of Economic Development approves (certifies) or denies proposals for small business incubators based on the ability of the incubator to meet statutory requirements of the program; the economic impact of the incubator on the community, conformance with area-wide and local economic development plans; and location of the incubator, in order to encourage geographic distribution of incubators across the state. Certified

incubators may receive contributions from taxpayers. The taxpayers in turn may receive tax credits in the amount of 50% of the contributions. The tax credits can be carried forward for five years and also be sold or transferred. The overall maximum amount of tax credits that can be authorized in any one calendar year is \$500,000.

# Economic Impact

*“Tax credits issued through the Small Business Incubator Program from the program’s inception through November 30, 2016, total approximately \$3.6 million, which attracted contributions totaling approximately \$7.2 million.”*

## Program Statistics

*“Most tenants are originally from Missouri.”*

These tenants chose the Small Business Incubators due to their unique locations and affiliations with major research institutions, hospitals and universities located in the state. Most graduates decided to stay in Missouri because of the founders' and workforce's residency. However, the graduates that relocated to other states identified the reasons for such decision as inability to raise additional funding or acquisition by another company. The information regarding the number of jobs, payroll and investment of graduate companies

is not complete because most incubators do not track such data and thus are unable to provide it. Fourteen out of the sixteen active incubators reported.

Annually a Budget of Revenues and Expenditures application is submitted by each Small Business Incubator

desiring to request Tax credits for the upcoming year. This report is due by the end of January, and the tax credits are then awarded based on the request of Capital Expenditures and Non-Operating Expenditures listed in this report. The following is a listing of the Incubators that were awarded tax credits, listed by year of approval.
